Your search for **+author:romano-critchley** did not return any results.

You may want to try an [Advanced Search](#) for additional options.

Please review the [Quick Tips](#) below or for more information see the [Search Tips](#).

Quick Tips

- Enter your search terms in lower case with a space between the terms.

sales offices

You can also enter a full question or concept in plain language.

Where are the sales offices?

- Capitalize proper nouns to search for specific people, places, or products.

John Colter, Netscape Navigator

- Enclose a phrase in double quotes to search for that exact phrase.

"museum of natural history" "museum of modern art"

- Narrow your searches by using a **+** if a search term must appear on a page.

museum +art

- Exclude pages by using a **-** if a search term must not appear on a page.

museum -Paris

Combine these techniques to create a specific search query. The better your description of the information you want, the more relevant your results will be.

museum +"natural history" dinosaur -Chicago

1 [Posters: A meta-model for intelligent adaptive multi-agent systems in open environments](#)

Thomas Juan, Leon Sterling

 July 2003 **Proceedings of the second international joint conference on Autonomous agents and multiagent systems**

Full text available: pdf (106.09 KB)

 Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

In this paper, we introduce the ROADMAP meta-model, designed to describe intelligent adaptive multi-agent systems in open environments. The meta-model captures our understanding of the properties of such systems and our perspective on organizational concepts such as roles. It defines agent constructs such as agents and roles, and their inter-relationships such as aggregation, in a way that best facilitates the development of intelligent adaptive systems in open environments. We intend to use the ...

Keywords: agent-oriented software engineering, intelligent adaptive systems, meta-model, open environments, software quality goals

2 [Towards an understanding of model executability](#)

Erwan Breton, Jean Bézivin

 October 2001 **Proceedings of the international conference on Formal Ontology in Information Systems - Volume 2001**

Full text available: pdf (1.15 MB)

 Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Processes are a major concern of information system. They need thus to be defined as precisely as any other artefact of the system. Meta-modeling techniques have proved their relevance for addressing such issues. However, a process meta-model may not be restricted to the definition of a set of concepts, relations and assertions. As the purpose of a process is to be executed, the underlying execution rules have also to be made explicit. In this paper we attempt to identify the main charac ...

Keywords: MOF, action semantics, meta-models, model execution, models, process meta-models

3 [Session 2: Techniques of software evolution: Metrics for applying GOF design patterns in refactoring processes](#)

Taichi Muraki, Motoshi Saeki

 September 2001 **Proceedings of the 4th International Workshop on Principles of Software Evolution**

 Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)
